CAREER OBJECTIVE

Mechanical Engineering undergraduate seeking an entry-level opportunity to apply skills in product design, AI, IoT, embedded systems, and healthcare technology. Interested in developing practical engineering solutions by integrating mechanical, electronics, and software technologies.

PROJECTS

HealthAI – AI-Powered Healthcare Assistant — Team Lead — Developed an AI-based healthcare solution involving medical analysis, medical report generation, and chatbot/assistant functionality. [Github](#)

Hospital Assistance Tracking & Smart Patient Flow Management System — Team Lead — Developed a healthcare-focused system for patient tracking, hospital assistance, and smart patient-flow management. [Github](#)

Intelligent Remote Healthcare & Assistance System — Team Lead — Developed a remote healthcare solution focused on continuous patient monitoring and remote healthcare assistance. [Github](#)

Drone for Medical Delivery – Team Lead — Designed a drone capable of carrying approximately 250 g payload for short-range delivery; achieved approximately 80% stable and controlled flight performance. [Github](#)

Blood Glucose Monitoring System (Glucometer) – Team Lead — Built an Arduino-based glucose monitoring system with approximately 85% measurement consistency; improved accuracy by approximately 20% through calibration techniques. [Github](#)

Wearable-Based Health & Fitness Alert System

IoT wearable for real-time heart-rate, SpO₂, and fall detection. [Github](#)

TECHNICAL SKILLS

Programming: C, Python (Basic), Java (basic)

AI / Computer Vision: Basic ML, OpenCV (Basic)

Embedded / IoT: Arduino, Sensor Integration

CAD: UG NX, AutoCAD

Manufacturing: CNC Basics, 3D Printing

Tools: MS Office

TRAINING & EXPERIENCE

I2I Program – KIOT: Python, OpenCV, basic ML concepts; exposure to reverse engineering and autonomous systems.

CNC Training – DMW Company: Basic machining operations, drawing interpretation, quality checks, and tolerance understanding.

Drone Training – IIT Madras: 2-day hands-on training in drone assembly, fabrication, flight operation, and basic control testing.

EDUCATION

B.E. Mechanical Engineering	Knowledge Institute of Technology, Salem	2023–2027	CGPA: 7.8
12th	SRV Innovative Public School	2022–2023	62.4%

ACHIEVEMENTS & CERTIFICATIONS

Best Innovation Award – E-Bike • Finalist – CMIT Hackathon • Winner – Technical Presentations • Participated in 5+ Hackathons • Drone Event – IIT Madras • NPTEL – ML & Deep Learning • NPTEL – Additive Manufacturing • Placement Ambassador • Treasurer – FLAME • Ideal Lab Ambassador • NSS Volunteer

AREA OF INTEREST

Product Design • R&D • AI & Healthcare • IoT • Embedded Systems • Occupational Health & Safety • Automotive
